I'm a second-year Informatics student at Universitas Multimedia Nusantara with a passion for building smart and secure software. I'm mainly interested in full-stack web development, machine learning, and cybersecurity, and I enjoy turning ideas into functional and useful systems.

Experience

Bank Syariah Indonesia

Jun 2026 - Aug 2026

IT Operation Group Intern

- Gained hands-on experience with Java, Spring Boot, TypeScript, and Nx Monorepo in an enterprise development environment.
- Contributed to process automation initiatives using Microsoft Power Apps to improve internal workflows.
- Handled database activities including data input, validation, organization, and data cleaning.
- Strengthened technical skills while gaining practical insights into IT operations and enterprise banking systems.

Bank Syariah Indonesia

Dec 2025 - Feb 2026

Software Engineer Intern

- Supported customer engagement and booth operations to acquire new banking customers and promote products.
- Assisted with daily branch operations and promotional initiatives alongside the sales team to support branch targets.
- Applied software development knowledge to design and build an interactive dashboard website and supporting database.
- Developed technical solutions to streamline branch performance tracking and customer screening processes.

Education

Universitas Multimedia Nusantara – Tangerang Selatan

Aug 2024 - Aug 2028

(Expected)

Informatics

Organizational Experience

BEM UMN's ALUNORA 2025

May 2025 – Nov 2025

Funding Specialist

- Coordinated sponsorship outreach and communication with external parties to support funding needs for university-scale programs.
- Prepared and followed up on sponsorship opportunities while maintaining communication with potential partners.

MANIFEST 2024

Sep 2024 - Dec 2024

Web Developer

- Developed and maintained websites to support organizational activities and community programs.
- Assisted with website updates, content management, and technical improvements.

Projects

• Cryptovision (Machine Learning, Web Development)

[Github](#)

Built machine learning models to predict short-term Bitcoin price movements using OHLCV data and deployed a real-time dashboard for prediction visualization. [Python](#)

• Nyx Hotel (Web Development, Full-Stack Development)

[Github](#)

Developed a hotel reservation platform through a collaboration between Informatics and Hotel Management students at Universitas Multimedia Nusantara (UMN), featuring room booking and reservation management. [React](#), [Vite](#), [Tailwind CSS](#), [Node.js](#), [Express.js](#), [MySQL](#), [MongoDB](#)

• GamesVault (Web Development, 3D Model)

[Github](#)

Built a web-based gaming handheld showroom combining interactive 3D device previews, product listings, external product links, and an admin system for managing the showroom. [React](#), [Vite](#), [Tailwind CSS](#), [Node.js](#), [Express.js](#), [Firebase](#)

- **TempleBound (Game Development, Web Development)**

[Github](#)

Developed a browser-based simulation game where players explore a temple-inspired world while managing character needs such as food, energy, hygiene, and mood. [React](#), [Vite](#), [JavaScript](#), [Bootstrap](#)

- **Valorant E-Sports Team Win Percentage Prediction Model (Machine Learning, Data Science)**

Developed an XGBoost regression model to predict Valorant Champions Tour (VCT) team win percentages using VLR.gg Rating 2.0 composite metrics. [Python](#), [XGBoost](#)

- **DashMoB (Web Development, Software Engineering)**

[Github](#)

Developed a responsive dashboard to digitize branch performance monitoring, replacing spreadsheet-based reporting with centralized data management, automated calculations, activity tracking, and secure access. [React](#), [Node.js](#), [Express.js](#), [MySQL](#)

- **Jalur Langit (Web Development, Product Development)**

[Devpost](#)

Developed a smart placement discovery and application platform for undergraduate medical students in Indonesia, using intelligent matching and automated application features to help users find clinical clerkship and internship opportunities. [React](#), [Vite](#), [Node.js](#), [Express.js](#)

Skills

- **Languages & Framework**

[C](#), [C#](#), [Java](#), [JavaScript \(React, Next.js\)](#), [Kotlin](#), [Python \(PyTorch\)](#), [Swift](#), [TypeScript](#)

- **Frontend**

[Bootstrap](#), [Tailwind CSS](#), [Vite](#), [NX Monorepo](#)

- **Backend**

[Express.js](#), [Node.js](#), [Spring Boot](#), [Spring Modulith](#)

- **Database & Tools**

[DBeaver](#), [Firebase](#), [MongoDB](#), [MySQL](#), [PostgreSQL](#), [Supabase](#)

- **Languages** : Bahasa Indonesia (Native) & English (Professional)

Competition

- **Garuda Hackaton 7.0 2026**

Garuda Hacks · 2026

- **GoogleCTF 2025 - Capture The Flag (CTF)**

Google · 2025

- **National Logic Competition 2023**

Schematics ITS · 2023
